

# Sunshine Coast Environmental Education Centre

## - Sunday Creek Campsite

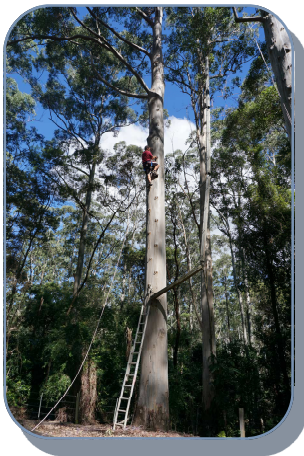

### Residential Camp

**Sunshine Coast Environmental Education Centre—Sunday Creek Campsite** specialises in running school camps catering for groups of up to 35 students. Typically, our camps focus on teamwork, leadership, and personal development, using the stunning Conondale Ranges as our source of inspiration.

**Our Vision:** Students participating in the program will work towards acquiring a greater love for, and understanding of themselves, each other and the earth, and a willingness to take positive action based on their new awareness.

**The Environment:** The Centre is surrounded by open forests but is in close proximity to Wet Sclerophyll forests and Rainforests. In the past it has been the centre for extensive indigenous, gold mining and logging history — and relics of this era abound.

**Facilities:** Sunday Creek Campsite offers a kitchen (with on-site caterer); multi-purpose hall (with fireplace); 2 student barracks consisting of 9 rooms and 1 teacher barracks consisting of 2 rooms; sports oval; fire pits; beach volleyball court; library; musical equipment; shower and toilet block. Our facilities are completely 'off the grid' yet offer all the luxuries and comforts of home. We have a standalone solar powered system for electricity, and harvest our own filtered rainwater for drinking. Our focus on sustainability and environmental awareness allows students to gain an understanding of how we can live sustainably and reduce our environmental impact in the future.

**Activities:** Typical Sunday Creek Campsite activities include Bushwalking, Orienteering Courses, Blindfold Activities, Teamwork Challenges, High Ropes, Gold Panning, Quartz Crushing, Bird Watching, Sensory Walks and many more. Our staff focus on debriefing all activities to encourage deep reflective learning, and at times this learning is documented through journaling or artwork.
